

Landowners, Graziers, Wildlife

Making Them Click!

Grazing For Better Wildlife

- Idle land needs pulsed grazing
- Stimulates new plants
- Quality animals require quality forage
- Proper grazing management is the key

Contacting The Landowner

- Introduce yourself to landowner.
- Explain what you do.
- Give them a farm tour.

Giving The Farm Tour

- Arrive On Time.
- Firm handshake.
- Clean vehicle.
- Clean clothes.
- Optimistic attitude.

Deer Hunters Farm
30 days before bow
season, August 1st

30 days rest, September 1st
Bow Season Opening Day

Building Landowner Interest

- Explain landscaping with livestock.
- Environmental benefits.
- Preserving open space.
- Clean water, rich soils, wildlife.

Nesting Bald Eagles

Major Building Blocks

- Securing long leases on land.
- Building landowner loyalty.
- Securing friendly landowners.
- Build landowner partnerships

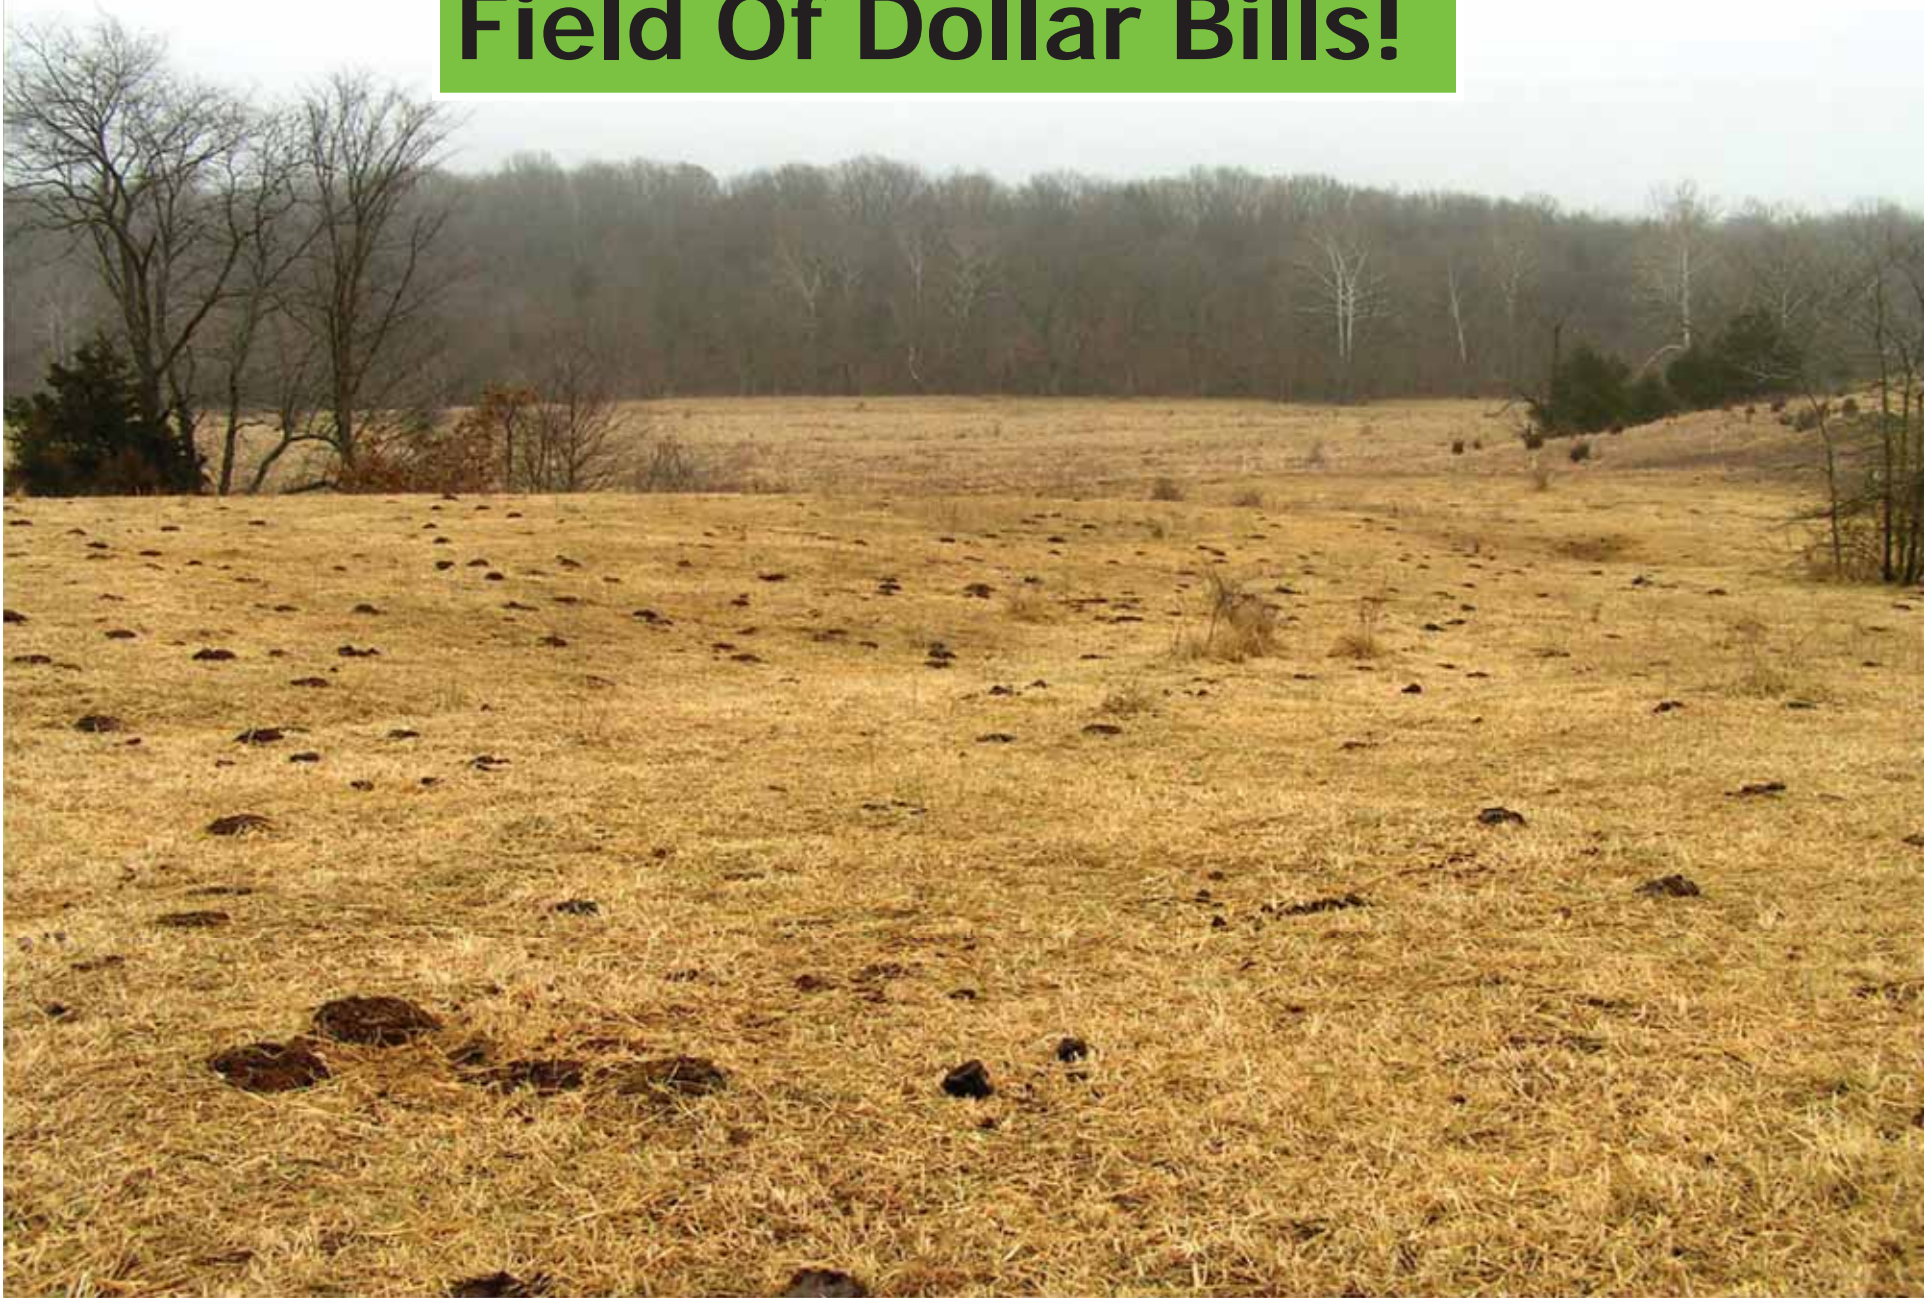

Holistic High Density Planned Grazing System.

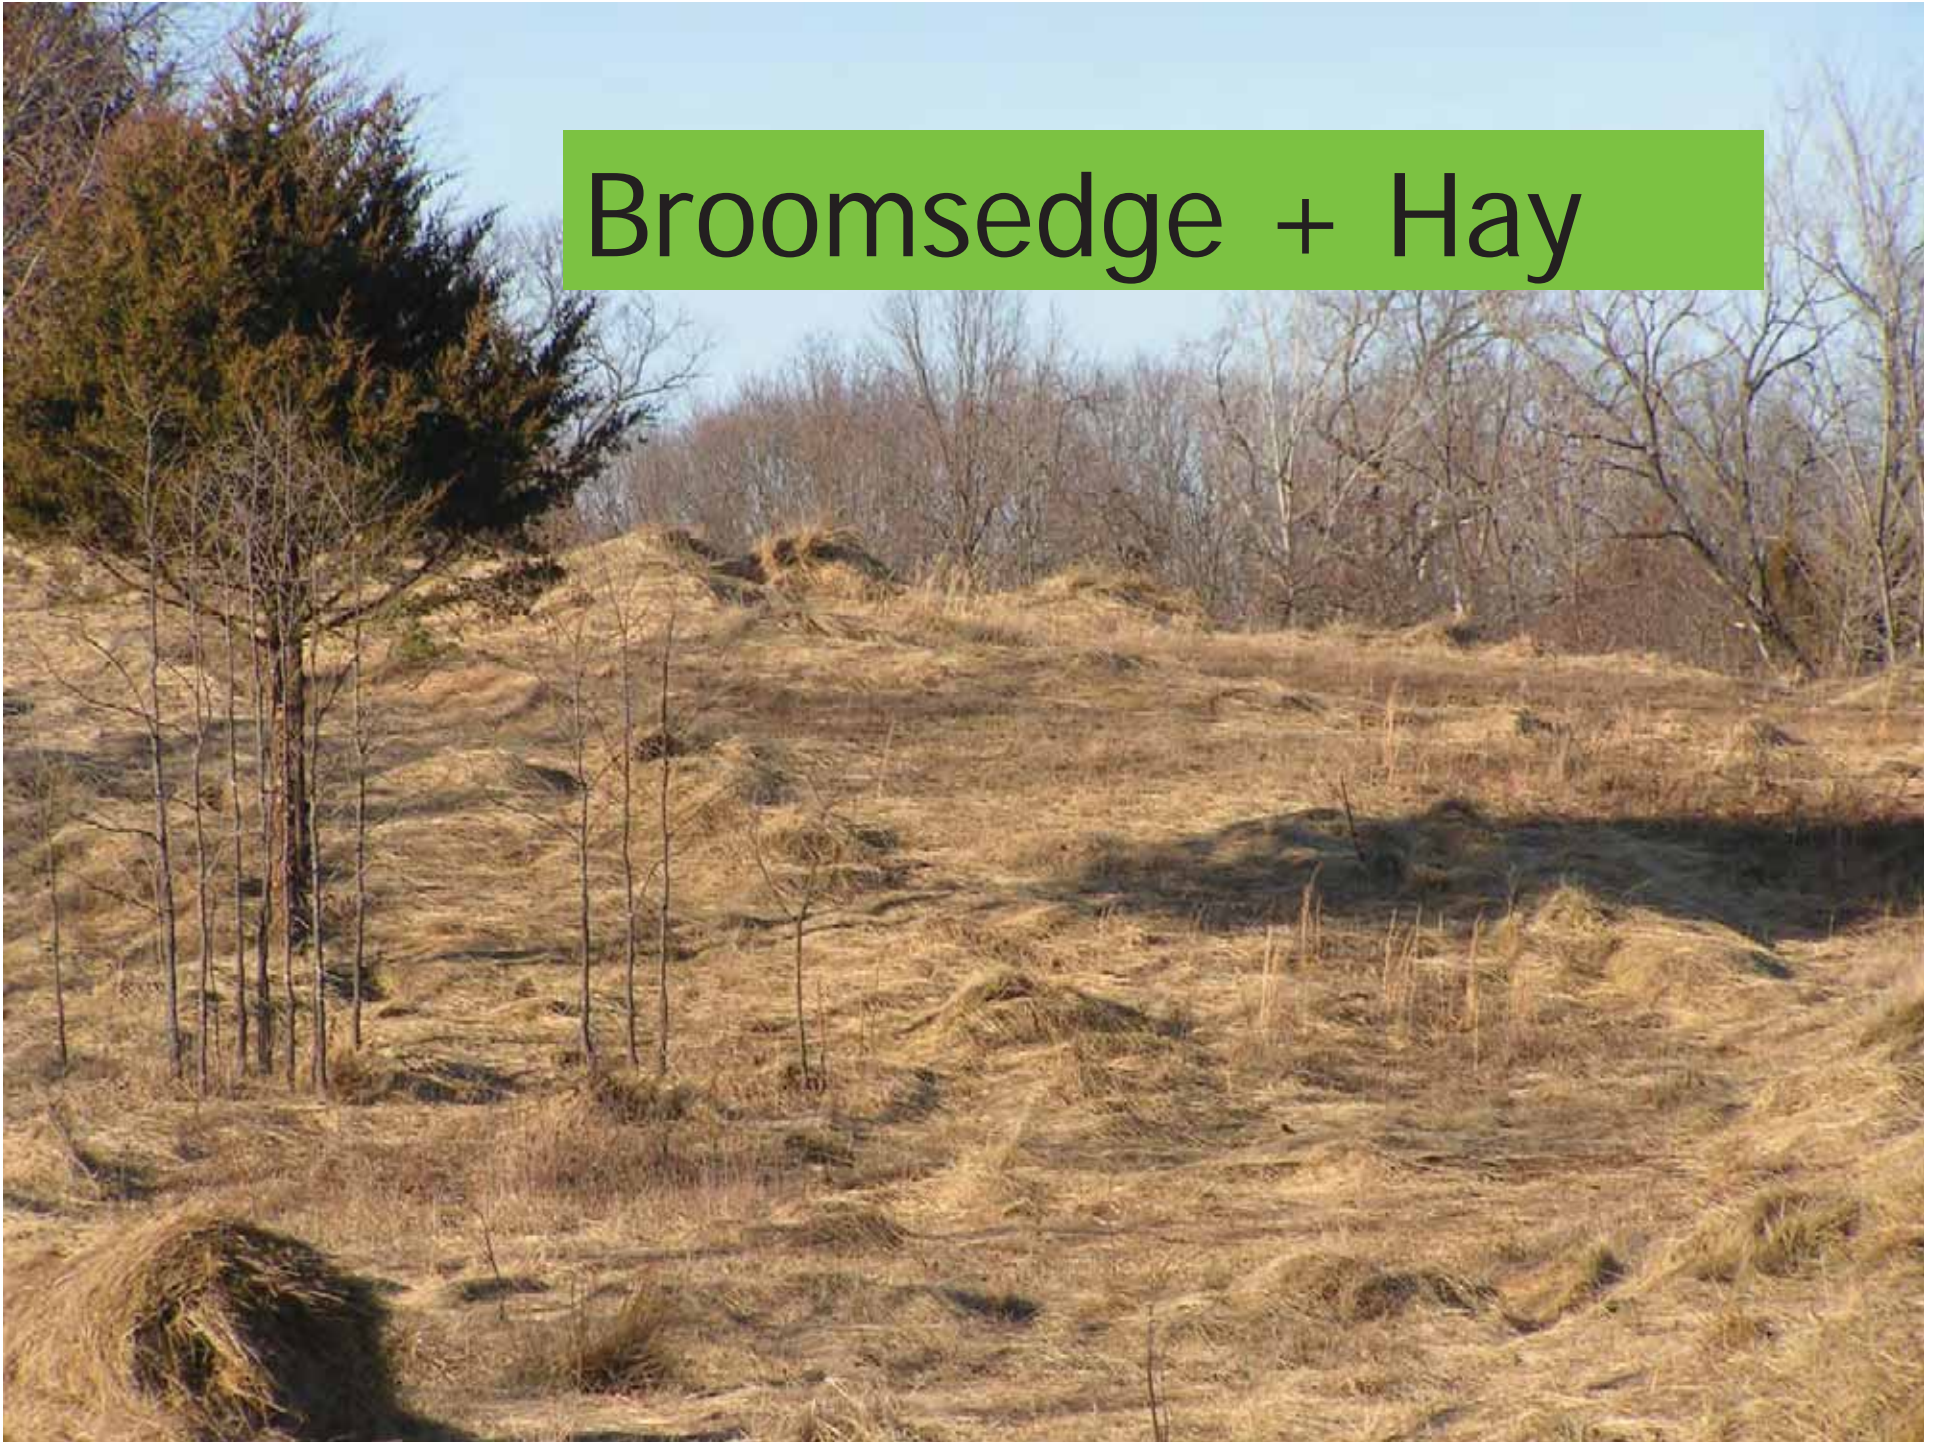

Most powerful grazing system
on earth.

No other system compares!

Field Of Dollar Bills!

Broomsedge + Hay

Keeping Landowner Updated

- Open line of communication.
- Weekly or bi-weekly email farm updates.
- Send farm progress pictures.

Landowner Projects

- Offered landowners cattle ownership.
- Performing Timber Stand Improvement projects.
- Fishing ponds, huge rewards.

Columbus Method

- Turn-em out in spring, discover them in the fall.
- Will not work !!
- Expert grazing is payment.

Plowing moss and brambles

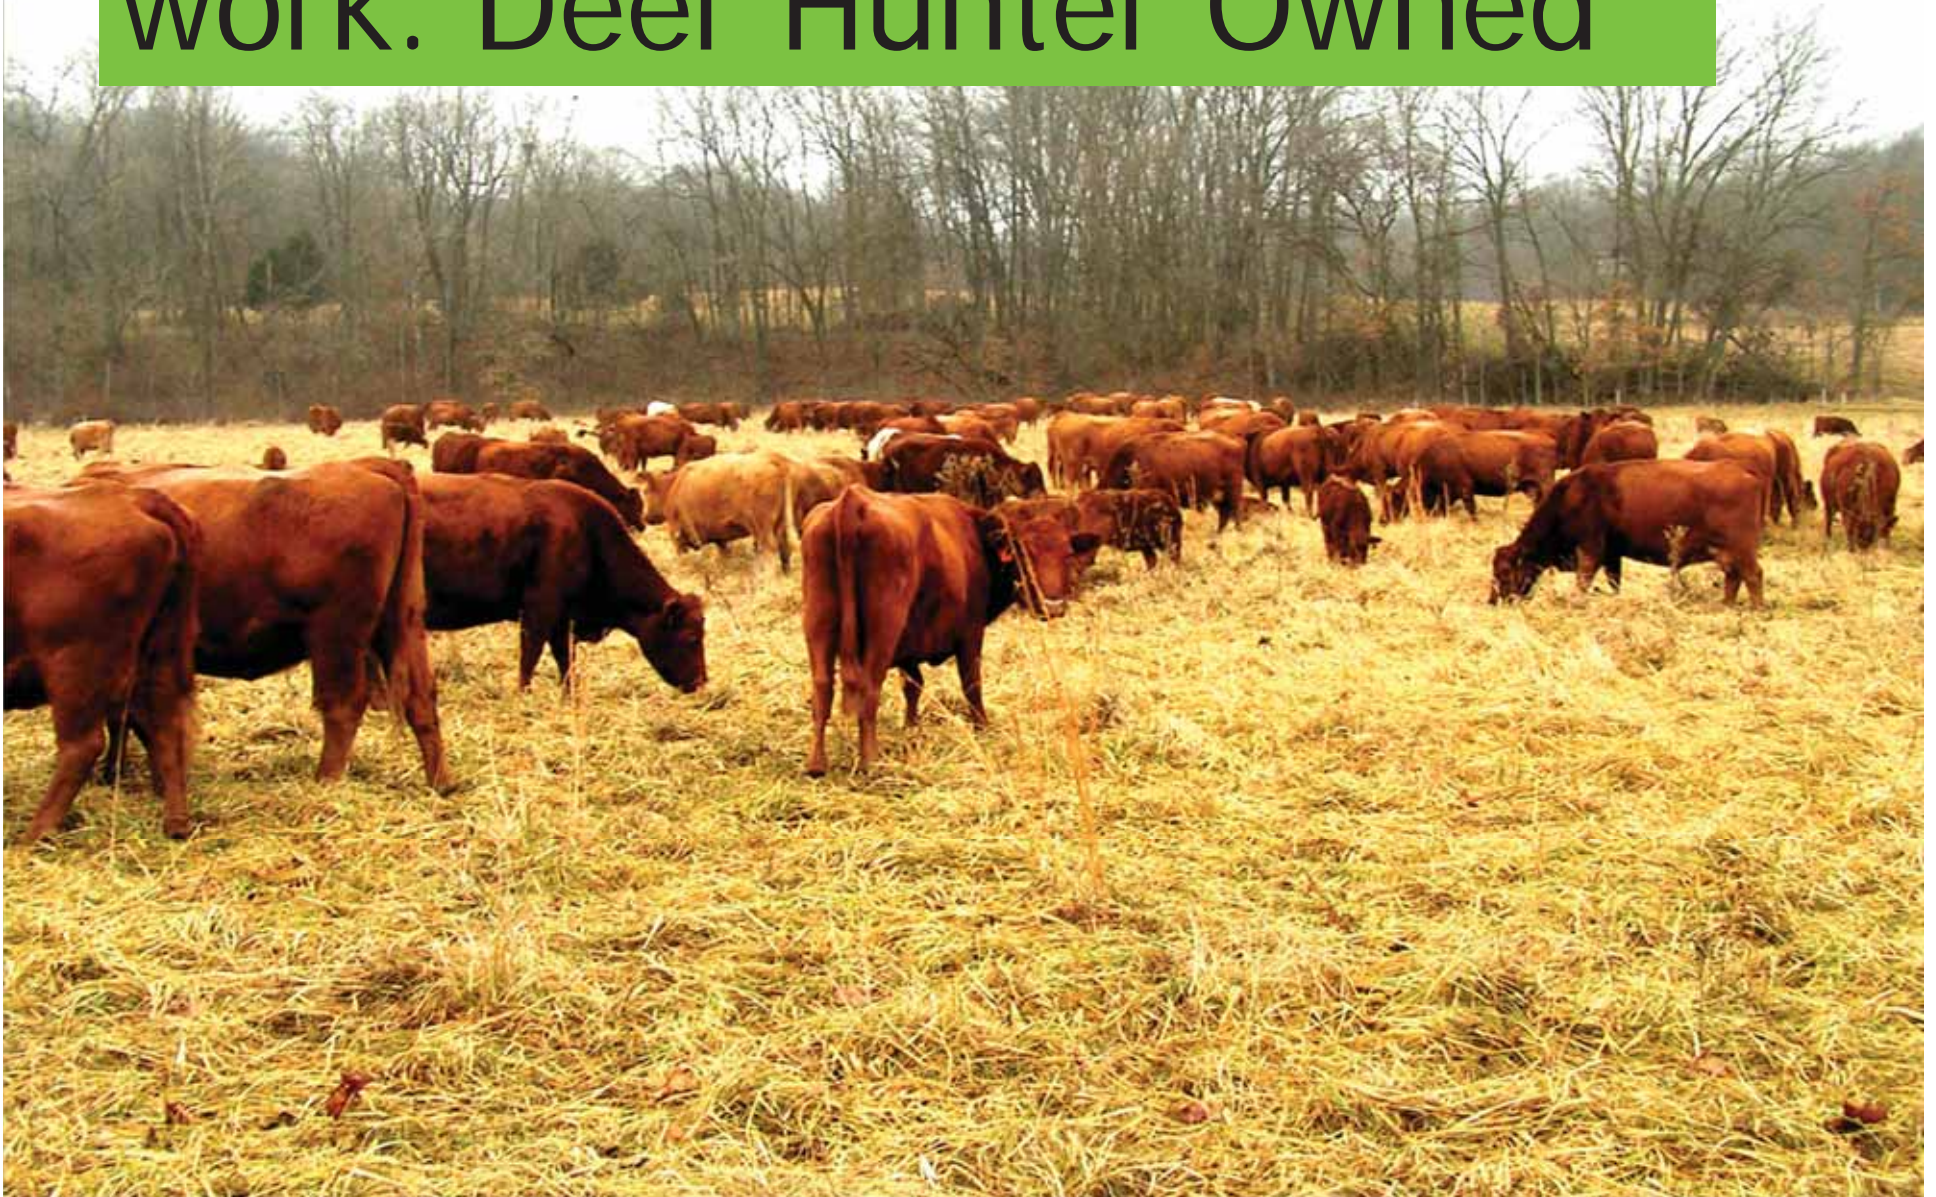

90 days rest, forbs and
grasses exploded

Breaking Down Thatch

- Idle thatch needs sunlight.
- Mob busts down thatch, bits of soil exposed.
- Organic matter with active microbes.

40 year idle farm, cows at work. Deer Hunter Owned

Build It, They Will Come

- Develop their environment and the wildlife will come home.
- Wildlife are drawn to most nutritious plants.
- The healthier the soil, the better the wildlife.

Wildlife, Sign Of Balance

- Every species of wildlife supports an additional 8 species.
- You are building a spider web of life.

Self Seeding Legumes

- Long recovery periods allow hard seed to form.
- No longer frost seeding legumes.

Legumes

- Legumes are magnets for all wildlife.
- High density/short grazing duration.
- Long recovery periods.

Legumes busting out of thatch.

Here's The Proof!

Landowner Hunters

- Graze off plots next to deer stands 30-60 days before season.
- Perfect wildlife food plot.
- Remove livestock from hunting areas.

Nesting Cover

- Leave cover blocks for nesting birds.
- Narrow cover strips are more predator friendly.
- Must have winter cover.

Winter Grazing

- Take half, leave half.
- This protects the ground.
- Leaves wildlife food and cover.
- Controls erosion.
- Earlier Spring growth.

It Is The Forage!

Summary

- Manage for the landowner and wildlife.
- Beat it up, let it recover.
- Mimick nature as much as possible.
- Enjoy yourself and have fun.

Life Time Lease
